***Allowable Subject Matter***

1. Claims 5-12 (to be renumbered as 1-8) are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claim 5 teaches an apparatus for reading data from a 3.5-inch micro floppy disk. The distinguishing elements of the claim are a filtering means for filtering the signal amplified by the amplifying means, wherein the filtering means is switched to a Chebyshev characteristic filter by the control means when a magnetic signal has been detected from the vicinity of the innermost portion of a 3.5-inch micro floppy disk and the filtering means is switched to a Butterworth characteristic filter when a magnetic signal has been detected from the vicinity of the outermost portion of the disk.

Claims 6 and 10 teach a method and apparatus for reading and writing data from/to a disk-shaped magnetic recording medium having an inner portion and an outer portion. The distinguishing elements of the claims are a characteristic filter for filtering the amplified signal, the characteristic filter configurable into one of a Chebyshev characteristic filter response configuration and a Butterworth characteristic filter response configuration, and a controller operating to configure the characteristic filter into one of the two filter response configurations corresponding to whether the magnetic head is detecting the signal from the inner portion or the outer portion of the disk-shaped magnetic recording medium.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
